

What is claimed is:

1. An outlet airflow direction control unit,  
comprising:

5

a frame having an inlet and an outlet, said outlet  
being provided on a peripheral wall with a plurality  
of radially projected fluid control elements; and

10

a fan being supported in said frame;

whereby when said fan is rotated to cause an amount  
of fluid to flow into and out of said frame via  
said inlet and said outlet, respectively, said  
15 fluid control elements provided in said frame are  
adapted to control a flow direction of said fluid  
flown out of said outlet.

2. The outlet airflow direction control unit as  
20 claimed in claim 1, wherein said fluid control  
elements are control blades.

3. The outlet airflow direction control unit as  
claimed in claim 1, wherein said fluid control  
25 elements are ribs.

4. An outlet airflow direction control unit,  
comprising:

a frame having an inlet and an outlet, said inlet  
5 being provided on a peripheral wall with a plurality  
of radially projected fluid control elements; and

a fan being supported in said frame;

10 whereby when said fan is rotated to cause an amount  
of fluid to flow into and out of said frame via  
said inlet and said outlet, respectively, said  
fluid control elements provided in said frame are  
adapted to control a flow direction of said fluid  
15 flown out of said outlet.

5. The outlet airflow direction control unit as  
claimed in claim 4, wherein said fluid control  
elements are control blades.

20

6. The outlet airflow direction control unit as  
claimed in claim 4, wherein said fluid control  
elements are ribs.
